# RTA Library Shelving

***Borroughs Ready-To-Assemble (or RTA) library shelving will enhance any office environment. RTA bookcases feature double wall construction, quality and versatility. An attractive, yet economical solution for displaying books and binders in legal libraries, corporate libraries or information display areas.***

## ***RTA Starter and Adder Units***

***Starter unit functions as a stand-alone bookcase. Adder unit is intended for cost-saving "side to-side" installation to create a row of units.***

## **Attractive and Strong**

Borroughs RTA library shelving units are steel for strength, and unlike economy units, they use sturdy double-wall construction. Each piece gets Borroughs' special 8-stage finish process to insure they look great, even after years of heavy use.

## **Versatile**

RTA library units are available as starter and adder units with or without backs. Adder units are used for side-to-side and back-to-back installations to create one continuous row of shelving. For ranges of units, order single face or double face end panels, depending on your particular requirements. Bookcases are also available with steel or glass doors, with or without lock.

## **Shelves**

Each shelf is designed specifically for book storage, and offers quick adjustability for different size books. Locking tabs hold each shelf securely in place and the rear flanges act as bookstops. Shelves adjust on 3/4" increments. Shelf capacity is 100 lbs., evenly distributed. Additional shelves are available in pairs only.

### ***Reference Shelf***

***Shelf slides out from either side; available for double face units only.***

### ***Wire Book Support***

***It is easily adjustable, and holds books firmly in place.***

### ***Sloped Base Shelf***

***Combination base shelf allows books to be stored straight or angled upward for easy browsing.***

### ***Sloping Magazine Shelves***

***Excellent to use for display of periodicals. Behind each shelf is a hidden area for back issues.***

# Easy-Trak™ Bi-File & Tri-File Systems

*Whether your books are in the main library or in archive storage, Easy-Trak saves floor space and increases book storage capacity. Systems are available in two row (Bi-File) to three row (Tri-File) deep configurations, and can be utilized with Record Master Case-Style Library Shelving. It is simply the best value in high-density mobile systems.*

- **Easy to Install.** Installs quickly and easily on carpet, tile, wood or concrete floors. No special tools, complicated alignments or costly platforms are required.
- **Easy to Use.** Five pounds of pressure moves 1,300 pounds of load. Strong, unibody aluminum carriages provide a carrying capacity of 3,500 pounds.
- **Easy to Level.** The adjustable track can be leveled at any time, even long after your materials are in place.

## Regular Stationary Bookstacks

*Three standard bookstacks provide 714 lineal storage inches.*

## Borroughs Easy-Trak 3+2 System

*Five Record Master Case-Style Library Units provide 1,190 lineal storage inches. 1.67 times more storage!*

## Anti-Tip System

Built-in carriage anti-tip arms float in rear track anti-tip rail. Arms do not contact the rail unless the unit tips, and, it is seismically approved.

*Track profile complies with ADA requirements.*

## ADA Compliant

Borroughs' track complies with ADA regulations for barrier-free access.

## Track Length

Virtually unlimited through splicing. Longest one piece standard track lengths are determined by access for office, freight elevators and stairways.

*Steel wheels roll on steel strips encased in aluminum tracks.*

## Smooth, Quiet Operation

For safety and noise reduction, the carriages include rubber bump cushions. Wheels are hardened steel ball bearings races (permanently greased and sealed) and will not deform under loads on the steel track runners.

## Configurations Available

*Easy-Trak Bi-File: 2+1 systems through 6+5 systems*

*Easy-Trak Tri-File: 2+1+1 systems through 6+5+5 systems*

*Bi-File System shown with a 4+3 configuration*

*Tri-File System shown with a 3+2+2 configuration*

*save valuable floor space  
and increase storage capacity*

# Easy-Trak™ Compacting Systems

*Borroughs Easy-Trak systems can increase capacity by as much as 100% or save as much as 50% of your floor space. Stored items remain ready for quick and easy retrieval. Easy-Trak converts aisles into valuable floor space by compacting rows of Borroughs library products into a single aisle configuration. With Easy-Trak mechanical-assist carriages, heavy loads move easily. As a plus, the handle has a built-in carriage parking lock mechanism for safety.*

### **Easy-Trak Mobile System**

*Easy-Trak utilize carriage and track, installed directly on floor surface, to provide high-density filing and storage.*

### **Versatile**

Easy-Trak can be used with many Borroughs filing and storage units on carpet, tile, wood or concrete floors.

### **Easy Installation**

Borroughs Easy-Trak systems install quickly unlike many mobile installations, which are permanent and expensive. Easy-Trak requires no special tools, no complicated alignments, no costly platforms or expensive grouting. Our adjustable ADA compliant track can be leveled at any time, even long after installation and loading.

### **Direct Drive Systems**

Easy-Trak's economical answer for small high-density storage requirements. Direct Drive allows carriages up to 9' long. Its outstanding mechanical-assist chain and sprocket gearbox system creates savings by driving carriages directly along the track. With its 9:1 drive ratio, moving carriages is quick and easy. Direct drive's durability record in hundreds of installations ensures the quality and reliability you need.

### **Responsive Drive Systems**

Easy-Trak Responsive Drive System, or RDS, allows carriages up to 15' long! RDS drives the carriage wheels directly via a continuous drive shaft. This eliminates carriage lag problems associated with longer carriages and assures smooth and responsive movement of the entire carriage. RDS carriages use larger, extra-strength channels, angles and dual bearing wheels to carry RDS' larger and heavier loads. For practical and economical library storage solutions, you can count on Borroughs. We make smart use of space and help people be more productive.

### **Responsive Drive System**

*Ergonomic one-spoke handle is used to operate the 16:1 ratio chain and sprocket gear box to drive front, middle and end wheels via drive shaft. Each 360° turn of the handle will move the carriage approximately 4.5".*

*blends beauty and multifunctional flexibility*

# Record Master<sup>®</sup> Case-Style Library

*Today, professional libraries demand an exceptional shelving system. It must solve a variety of space problems, be strong and durable, yet incorporate a blend of beauty and multifunctional flexibility. **Borroughs Record Master Case-Style Library Shelving** solves all these needs, yet it remains easy on the budget and is simple to install.*

### **Case-Style Library Unit**

*Four-Post, wedge-locking design, consisting of three basic parts: uprights, shelves and shelf supports.*

## Strong & Dependable

Record Master's strong and rigid four post construction will carry even the heaviest of book collections safely. Double steel shoulder rivets attach securely into uprights and full-width shelf supports provide exceptional strength and rigidity.

## Quality Appearance & Finish

No unsightly holes, smooth, unbroken lines give Record Master Case-Style Library units a crisp, clean contemporary appearance. This furniture-quality finish looks great in any library environment.

## Shelves

Case-style shelves formed of 18 gauge cold rolled steel with 5/8" flanges on all sides. Shelves are adjustable on 1 1/2" centers. Shelf capacity is 3 to 3.5 pounds per inch; evenly distributed.

### **Full-Width Reference Shelf**

*Ball bearing extension slides allow for easy access. Available for single face and double face units.*

### **Hinged Periodical Shelf**

*Displays periodicals in an easy-to-read upright position. 1 7/8" retaining lip, a choice of 15° or 20° slope.*

### **Findable Book Support**

*Available heights: 6" or 9". Include a non-skid composition on the base.*

### **Sliding Wire Book Support**

*Self-locking when force is applied to the wire, yet moves easily when force is applied near the rail.*
